

August 2018

NEW HYDE PARK

The LIRR Expansion Project from Floral Park to Hicksville, one of the region's most significant transportation infrastructure projects, is now underway throughout the communities along a nearly ten mile stretch of mainline track.

During the month of August, you will see construction crews performing work in New Hyde Park. Specifically, there will be crews relocating and installing underground utilities, and conducting pre-construction inspections of the existing conditions of structures surrounding worksites. By way of explanation:

Existing Structure Survey

- Property located within a specified radius of anticipated construction work requires a pre-construction photo inspection
- The survey is conducted to ensure the property is protected in the unlikely event of any damage
- Vibranalysis Inc., an independent consulting firm, will perform the survey
- Inspection consists of photographs and written documentation, recording the existing conditions of the interiors and exteriors of the structures surrounding the site

Covert Avenue Underground Utility Relocation

- Along Covert Avenue, between 1st Avenue and 2nd Avenue, construction teams from 3rd Track Constructors, National Grid, PSEG Long Island, Verizon, Altice, and Light Tower (or their respective contractors) will need to periodically limit traffic to a single lane to allow for the underground utilities to be relocated
- While traffic may be impacted through the end of the year, the construction team will provide cones, flagmen and signage at the work site, as needed, to minimize interruptions

South 8th Street Underground Utility Installation

- Associated with the underground utility relocation along Covert Avenue, crews will work on South 8th Street
- Work will include boring underneath the railroad tracks to allow for the installation of six conduits that will, ultimately, house telecom fiber optic wires
